INTRODUCTION

The ReservePro System Policy Handbook provides guidelines and operational policies for the ReservePro Room Booking Management System. The system is designed to help users easily search, book, and manage room reservations for apartments, hotels, and other accommodation facilities through a web-based platform.

This handbook establishes the policies and procedures that ensure the proper use, security, and management of the system. It outlines rules regarding user accounts, booking management, system security, data privacy, and administrative responsibilities. These policies aim to maintain system reliability, protect user data, and ensure fair and efficient use of the ReservePro platform.

The handbook serves as a reference for users, administrators, and developers involved in the operation and maintenance of the system.

Vision

ReservePro envisions becoming a reliable and user-friendly room booking platform that simplifies the process of searching, reserving, and managing accommodations for both users and administrators.

Mission

The mission of ReservePro is to provide a secure, user-friendly, and efficient web-based booking system that allows users to easily find and reserve rooms while enabling administrators to manage listings and reservations effectively. The platform aims to improve booking management, prevent double reservations, and deliver a smooth and reliable experience for both users and accommodation providers.

1. User Account Policy

Account Registration

- Registration requires a unique email of username.
- Users must verify their emails to activate the account.

Password Requirements

- Passwords must follow strong complexity rules.
- Minimum 8 characters.
- Passwords are stored hashed and salted.
- Users cannot reuse their last 3 passwords.

Password Reset

- Password reset uses secure, tokenized links with expiration (15-30 minutes).

Account Updates

- Users may update profile information but cannot change account ID or email without approval.

Account Suspension

Account suspension may occur for :

- Policy violations.
- Multiple failed login attempts.

2. Authentication & Security Policy

Credential Protection

- Login credentials are never stored in plaintext.
- Passwords are securely stored using hashing and salting techniques.

Multi-factor Authentication

- Multi-factor authentication is optional for regular users.
- Multi-factor authentication is required for administrators and privileged accounts.

Failed Login Protection

- Accounts are locked after five consecutive failed login attempts.
- Locked accounts automatically unlock after 30 minutes or through administrator intervention.

3. Booking Policy

Booking Eligibility

- Users can book rooms only if the room is available and within the allowed capacity.
- The system verifies room availability before confirming a reservation.

Double Booking Prevention

- The system prevents double booking through database validation.
- Transaction locking ensures that only one booking can be confirmed for the same time slot.

Booking Confirmation

- A booking is confirmed only after a system verifies the room availability.
- Confirmation notifications are sent to the user through :
 - Email notification
 - In-app system notifications

Booking Details

Users may provide additional booking information such as :

- Number of participants
- Equipment or facility requests
- Special requirements

Booking Time Requirements

- Booking must be made at least 24 hours in advance.
- This ensures that rooms and resources can be properly prepared.

Booking Modification

- Users may modify their bookings up to 12 hours before the scheduled time.
- Late modifications may require administrator approval.

Recurring Bookings

- Recurring bookings must pass system validation for each occurrence to ensure room availability.

Administrative Overrides

- Administrators may override bookings in special or emergency situations.

Booking Conflict Handling

- If a booking conflict occurs, the system will automatically reject the request and notify the user.
- Each user is allowed a maximum of three (3) booking attempts per day with cooldown periods after each attempt.
- If the user exceeds the allowed attempts, booking access will be temporarily blocked for 24 hours.

4. Cancellation Policy

Cancellation by Users

- Users may cancel their reservation before the scheduled booking time.
- The cancellation must be done through the ReservePro system dashboard.

Cancellation Time Limit

- Reservations must be canceled at least 12 hours before the scheduled booking time.
- Late cancellations may be restricted or require administrator approval.

Automatic Cancellation

- Reservations may be automatically canceled if the booking is not confirmed, payment fails, or system conflicts occur.
- The system will update the booking status, notify the user, release the reserved slot, and notify the administrator.
- If payment was made, a refund may be processed or forwarded to the administrator.

Cancellation Time Limit

- After cancellation, users may create a new reservation if the slot is still available.
- Cancelled bookings remain recorded in the system for monitoring.
- Rebooking may be limited to one attempt within 7 days and is not allowed if the original reservation date has passed.

5. Administrator Policy

Administrator Access

- Administrator accounts are granted higher-level access to manage the ReservePro System.
- Only authorized personnel are allowed to create or manage administrator accounts.

User management

Administrators are responsible for managing user accounts, including :

- Viewing registered users.
- Updating user information when necessary.
- Suspending or reactivating user accounts.

Room and Listing Management

Administrators can manage room listings and accommodation details, including :

- Adding new room listings.
- Editing room information.
- Removing unavailable or inactive listings.

Booking Management

Administrators may monitor and manage reservations by :

- Viewing all booking records.
- Resolving booking conflicts.
- Overriding reservations when necessary.

Data Security Responsibility

Administrators must ensure that :

- User data is handled securely and confidentiality.
- Unauthorized access to the system is prevented.
- Security policies are properly enforced.

Administrator Accountability

- All administrative actions are logged by the system.
- Administrators are responsible for maintaining the integrity and proper use of the system.

6. Data Privacy and Compliance Policy

Data Collection

- The ReservePro system collects only necessary user information required for booking and account management.

This may include :

- Name
- Email Address
- Contact Information
- Booking Details

Data Protection

- All user data is stored in a secure database environment.
- Security measures are implemented to prevent unauthorized access, loss, or misuse of information.

User Privacy

- Personal information collected by the system will not be shared with third parties without user consent.
- User data is used strictly for system operations and booking management.

Secure Data Transmission

- Sensitive information transmitted through the system is protected using secure communication protocols.
- This helps ensure that data exchanged between users and the system remains confidential.

Data Access Control

- Access to user data is restricted to authorized administrators only.
- Administrators must follow strict guidelines when viewing or managing user information.

Compliance with Privacy Standards

- The ReservePro system follows applicable data privacy and security practices.
- These practices aim to protect user rights, personal information, and system integrity.

7. Room Management Policy

Room Information Management

Each room listed in the ReservePro system must contain accurate information, including :

- Room ID
- Room Name
- Description
- Capacity
- Amenities or equipment

Room Availability

- Room availability must be regularly updated in the system.
- Rooms that are unavailable due to maintenance or other reasons must be temporarily disabled in the system.

Room Updates

- Administrators may add, update, or remove room listings when necessary.
- Any changes made to room information must be accurately recorded in the system.

Room Maintenance

- Rooms that require repair or maintenance should be marked as unavailable until the issue has been resolved.
- Administrators must ensure that room conditions are safe and suitable for guests.

Room Data Accuracy

- All room information stored in the system must be accurate and regularly reviewed.
- Incorrect or outdated room details must be corrected immediately.

8. System Availability and Maintenance Policy

System Availability

- The ReservePro system aims to maintain high availability to ensure that users can access the platform anytime.
- Temporary interruptions may occur due to scheduled maintenance or technical issues.

Scheduled Maintenance

- System maintenance activities may be conducted to improve performance and security.
- Users will be notified in advance when scheduled maintenance is planned.

System Monitoring

- Administrators monitor the system regularly to ensure proper performance and stability.
- Monitoring helps detect errors, downtime, or unusual activities.

Backup and Recovery

- Regular system backups are performed to protect important data.
- In case of system failure or data loss, the backup system allows data recovery and restoration.

System Updates

- System updates may be implemented to fix bugs, improve features, and enhance security.
- Updates are applied carefully to avoid disruption to system operations.

Proper Use of the System

- Users must use the ReservePro system only for legitimate booking and reservation purposes.
- All activities performed within the system must follow the policies and guidelines of ReservePro.

Prohibited Activities

Users are strictly prohibited from performing the following actions :

- Attempting to hack, exploit, or damage the system.
- Creating fraudulent or fake bookings.
- Using unauthorized automated tools or scripts to access the system.
- Attempting to gain unauthorized access to other user accounts or system data.

9. Acceptable Use Policy

Responsible User Behavior

- Users must ensure that all information they provide is accurate and truthful.
- Users must ensure that all information they provide is accurate and truthful.

Consequences of Violations

Violation of the Acceptable Use Policy may result in :

- Temporary account suspension.
- Permanent account termination
- Administrative review of user activities.

Reporting Violations

- Users are encouraged to report suspicious or inappropriate activities to system administrators.
- Reported incidents will be investigated to maintain system integrity and security.

10. Logging, Monitoring, and Reporting Policy

Activity Logging

- The ReservePro system records important user and system activities to maintain security and accountability.

Logged activities may include :

- User login and logout events.
- Booking creation, modification, and cancellation.
- Administrative actions.

Log Information

Each system log entry includes the following details :

- User ID
- Timestamp
- Type of activity performed.

System Monitoring

- Administrators monitor the system regularly to ensure proper performance and stability.
- Monitoring helps detect errors, downtime, or unusual activities.

Access to Logs

- Access to system logs is restricted to authorized administrators only.
- Logs must be handled responsibly to protect user privacy and system integrity.

Reporting and Analysis

- The system may generate reports based on collected data and logs.

Reports may include :

- Room Booking Statistics
- User activity reports
- System usage trends

User Agreement

By using the ReservePro Room Booking Management System, users confirm that they have read, understood, and agreed to follow the policies and guidelines stated in this handbook. Users are responsible for maintaining the confidentiality of their accounts and using the system only for legitimate booking purposes. Administrators are responsible for enforcing system policies and maintaining system security. Failure to comply with these policies may result in account suspension, cancellation of reservations, or restriction of access to the system.

Acknowledgement

I confirm that I have read and understood the ReservePro System Policy Handbook and agree to follow all policies stated in this document.
